Pretty okay game for being under \$2. There are some issues like the mouse not being contained within the game and no resolution options but the potential for a great game is there. Pros: - Good looting system. - Rouge-like - Cheap (At the time of this review) - Easy to pick up and play Cons: - No resolution options - Mouse not contained within game (Can be remedied with 3rd party programs) - Game can freeze on black screen when tabbed out - Defaults to fullscreen. - "Meh" Graphics All in all I'd give it a 6/10. For less than \$2 I think it will be worth it so long as the devs keep updating the game.. You really shouldn't judge this game because of it's graphics because graphics sometimes don't matter if the game plays well, and this game does. Loot or

Die is actually alot of fun when you start progressing through the game, especially with friends. The controls are easy to use and feel good and defeating a boss is rewarding. If you like side scrolling shooters you should definitely give this game a try.. Pretty okay game for being under \$2. I had a good time playing this with a friend despite it not looking very visually appealing.. 11/10 would press escape again in the middle of a level. Its a good game ya know
