Oh boy, a few things stand out about this game, and it isn't good:

- Fabricated ESRB rating. [ESRB.org isn't turning up any results.](#)
- Developer says he updated the game thrice, starting in September, but [SteamDB.info](#) says otherwise.
- GTP INDIE CUP 2018 seems to be a Russian-exclusive event and I can't find anything that this game was part of it.

Generally, unpolished Unity game. Jumping controls are awful and have high latency between button press and action in-game. Sound design uses likely placeholders. Impaling sounds like it is coming from someone's mouth when trying to improvise blood splatter. Drowning is screaming when the player touches the sea floor rather than instantaneous when head goes below water surface. This game is a prototype and not a finished product. Poor controller support. JoyToKey or Steam's Big Picture Mode isn't a good solution to the problem. Avoid. Refund!
